

PERFORMANCE AUTOMOTIVE GASKETS

Domestic and Import

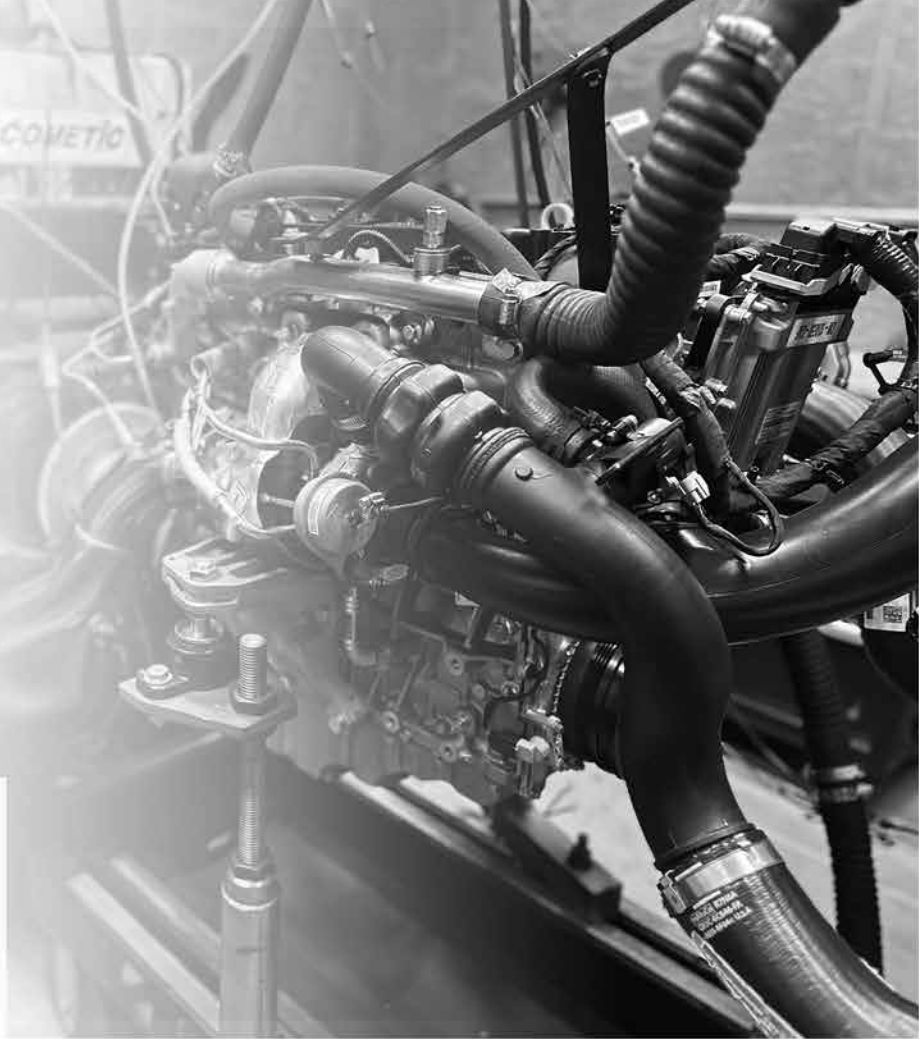

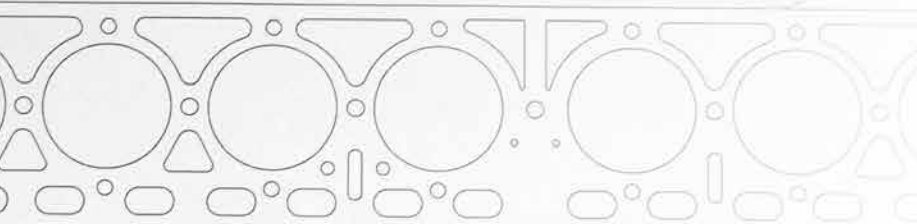

2026

Gasket Development

Cometic provides customers with quality products, born of exhaustive research and development.

Cometic's Superflow 902S Dynamometer positions us a leader in gasket design and technology, and affords us the ability to analyze gasket designs and materials in the most extreme conditions. Alongside our in-house research and development, we also collaborate with our performance partners, who compete in the most exacting environments, to ensure your gasket won't fail when you need it most.

Custom Gaskets

Need to change a gasket bore size, thickness or both? Do you need a complete gasket design? The process starts with a simple phone call.

Cometic's in-house technical sales team can accommodate virtually any engine configuration, from naturally aspirated to the most exotic turbo or nitrous injected engines. Our commitment is to provide innovative, quality gaskets while maximizing your engine's power and performance. When customization is the only option, Cometic delivers!

How does Cometic do it? The process starts and ends under one roof in Concord, Ohio. Once our technical sales team understands your needs, design engineers draw the gasket with state-of-the-art software, and then it is off to manufacturing. Your gasket is engineered from the highest quality materials before being shipped. If special tooling is required, Cometic always provides a pre-production estimate for approval.

The passion for racing runs deep with our technical sales and engineering teams. We understand the importance of perfection in your next engine build because we're all high-performance aficionados!

OEM Production Gaskets

Cometic is your one source for OEM gaskets, from prototyping to full production.

We currently develop sealing solutions in nearly every environment for customers in the automotive, marine, powersports, industrial, and stationary power industries. Prototyping is essential and economical. Our in-house tool and die shop offers custom tooling options and quick turnaround. Not only are we ISO 9001:2015 Certified, but we have stamping, laser cutting, rubber-injection molding and 5-axis machining capabilities.

Flexibility and communication are key. Cometic understands there are countless variables in determining design, volume, and production forecasts. We are accustomed to working in dynamic environments and maintain the existing knowledge base and part awareness during the transition from the early stages of development through production, without the hassle of changing suppliers. Inventory turns are essential. We can work together for a delivery solution that best fits your inventory level and cash flow needs.

Partner Relationships

Cometic's gaskets are the industry standard for championship-winning teams and engine builders across multiple disciplines of both professional and amateur motorsports. Since its inception in 1989, Cometic has built relationships with the most reputable engine builders in the industry. Those relationships create the foundation on which Cometic's gaskets are engineered, validated and manufactured for everyday use, or in the most competitive and demanding environments.

MLS HEAD GASKETS

Q: CAN MLS HEAD GASKETS BE USED WITH ENGINES SETUP WITH O-RINGS OR RECEIVER GROOVES AROUND THE CYLINDER BORES?

A: No. MLS head gaskets require smooth, flat and true head and deck surfaces to seal. Most of the time with o-ring setups the wire and groove fall where our gasket's combustion seal is located; therefore, the wire will hold the gasket and not allow proper compression while the receiver grooves allow combustion gases to escape.

MLS HEAD GASKET INSTALLATION

Q: WHY DOES COMETIC RECOMMEND MLS GASKETS TO BE INSTALLED DRY?

A: Cometic Multi-Layer Steel (MLS) head gaskets go on dry because they are coated with a sealant. Each MLS head gasket is coated with a .001" thick proprietary coating that is bonded to the outer stainless steel layers. Adding an additional sealer can hinder the performance of an MLS head gasket.

TORQUE RECOMMENDATION

Q: WHAT HEAD BOLT/STUD TORQUE DO YOU RECOMMEND WHEN USING AN MLS GASKET?

A: When using MLS head gaskets always refer to the manufacturer of the fastener to determine accurate torque values. Appropriate torque is critical when installing new gaskets of any kind.

SURFACE FINISHING

Q: WHAT SURFACE FINISH IS REQUIRED TO US AN MLS HEAD GASKET?

A: A surface finish of 50 RA (roughness average) or finer, is recommended for a proper gasket seal. Anything rougher may conflict with the gasket design.

CUSTOM GASKETS

Q: CAN I ORDER HEAD GASKETS WITH A DIFFERENT THICKNESS AND/OR BORE SIZE THAN YOU HAVE IN YOUR CATALOG?

A: Cometic offers a wide range of options tailored to your specific application. For assistance, call our technical support line at 440-354-0777.

GASKETS AVAILABLE

Q: DOES COMETIC OFFER MORE THAN JUST HEAD GASKETS?

A: Absolutely! Cometic has the capabilities to make every gasket and seal needed to overhaul nearly any type of engine. We offer Rubber Molded Valve Cover Gaskets, Intake, Exhaust, Timing Cover, Oil Pan, Rear Main Seals, Valve Stem Seals, Carburetor Gaskets, and much more!

NEED IT CUSTOM?

Cometic's in-house Technical Sales Team understands your needs, working directly with our design engineers to ensure the gasket is drawn with state-of-the-art software and manufactured with the best materials, utilizing the most current and efficient manufacturing processes.

MLS | Multi-Layer Steel (Fully Embossed)

MLS technology features fully embossed active combustion seals located on the outer layers of the gasket. Precise embossments for critical sealing around water and oil passages are also formed on the outer layers. These are combined with Cometic's proprietary coated and uncoated stainless-steel layers to deliver exceptional sealing performance while reducing the required clamp load and minimizing bore distortion.

Optional shim layers can be added to tailor the overall gasket thickness to specific engine requirements.

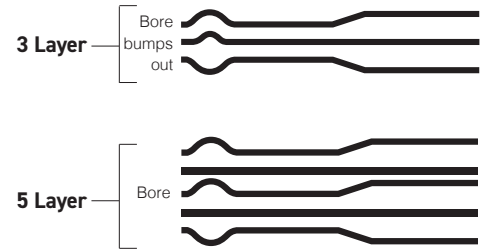

AVAILABLE THICKNESSES*

(3-LAYER):

.023", .030", .036", .040", .045", .051"

(5-LAYER):

.050", .056", .060", .066", .070", .075", .080", .086", .092", .098", .120", .140"

HP | High Performance Shim

HP Shim technology places active combustion seal embossments and precision water/oil sealing embossments on the outer layers. Designed primarily for open-deck engine platforms, HP technology incorporates a dedicated shim layer directly beneath the combustion seal embossment (unlike the offset styles seen in MLX or DST technologies).

This strategically placed shim layer, is engineered with precise thickness and width, that amplifies stress concentration around the combustion chamber to reduce distortion and deliver a dependable seal under demanding conditions.

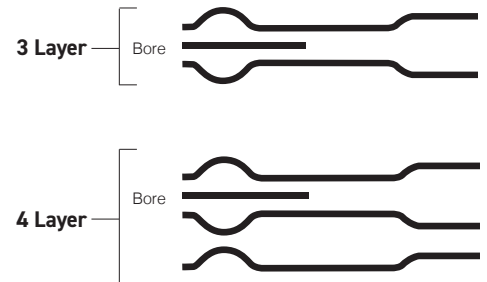

AVAILABLE THICKNESSES*

(3-LAYER):

Ranges from .024" - .036"

(4-LAYER):

Ranges from .038" - .054"

MLX | Multi-Layer Xtreme

MLX technology builds upon the MLS platform by incorporating a center stainless steel layer that is precision-folded. This "stopper" design improves clamp and provides local stress and sealing integrity around the combustion chamber without increasing bore distortion.

Precision embossments on the outer layers provide sealing for oil and coolant passages, ensuring all critical systems are reliably isolated.

AVAILABLE THICKNESSES*

(3-LAYER):

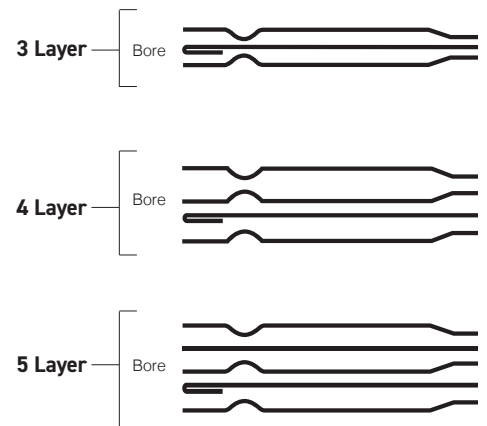

Ranges from .028" - .032"

(4-LAYER):

Ranges from .038" - .044"

(5-LAYER):

Ranges from .052" - .068"

NEW!

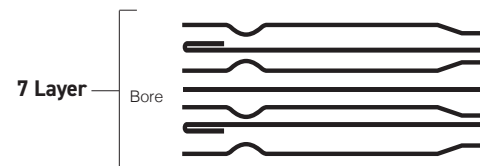

DST | Dual Stopper Technology

DST is the next evolution of Cometic's proven Multi-Layer Steel and MLX Stopper designs. DST combines dual integrated, precision-folded stainless steel stopper layers with our embossed, proprietary-coated sealing layers. This construction delivers a uniform, evenly distributed clamping force across both the cylinder head and block combustion seal, significantly reducing bore distortion and enhancing overall sealing reliability.

DST gaskets are engineered as a direct bolt-on solution, eliminating the need for additional head machining, grooving, or o-ringing typically required in forced induction extreme performance applications.

AVAILABLE THICKNESSES*

.063", .071"

*NOTE: Not all thicknesses are available for every application.

MP

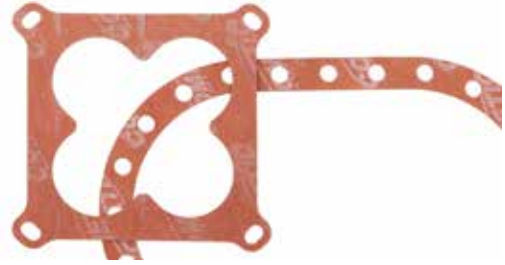

A high-quality synthetic material engineered for superior resistance to oil, fuel, ozone, and weathering. It offers excellent low flange pressure sealability and exceptional bolt torque retention. MP performs exceptionally well where chemical resistance and long-term sealing performance are critical.

RECOMMENDED USE:

- Carburetor Flange Gasket
- Metering Block
- Fuel Cell Gasket

*THICKNESS:

.062"

HTG

Features a metal-reinforced sealing material designed to seal irregular-surfaced flanges with reliability and resilience. Layered construction, a steel backing for strength, a graphite facing for high-temperature resistance, and a compressible fiber core for conformability. This robust combination delivers superior sealing performance at temperatures up to 1400°F.

RECOMMENDED USE:

- Exhaust Gaskets
- Turbo Gaskets

*THICKNESS:

.094"

RC

Consists of a 75-durometer NBR (nitrile butadiene rubber) coating applied to 1010 1/4 hard carbon steel. The NBR layer offers excellent resistance to oils, fuels, and coolants, while the steel core provides structural strength and dimensional stability.

RECOMMENDED USE:

- Differential Gaskets
- Base & Engine Case Gaskets

*THICKNESS:

.010" .012" .014" .016"
.020" .030"

Copper

Made from C110 copper, the purest form of oxygen-free copper, offers excellent corrosion resistance, superior ductility, and high thermal conductivity. It also resists embrittlement under heat. Cometic utilizes 99.9% pure copper, precision-tested for flatness to provide the most reliable seal between the cylinder head and engine block. For optimal performance, O-ringing is recommended.

RECOMMENDED USE:

- Head Gaskets
- Base Gaskets
- Exhaust Gaskets

*THICKNESS:

.005" .010" .016" .020" .032"
.043" .050" .063" .094"

Armor Clad

Featuring a high-temperature, high-performance fiber core, clad-style laminated with carbon steel layers on both sides. This construction delivers exceptional strength, thermal resistance, durability and is temperature rated up to 1,600° F.

RECOMMENDED USE:

- Exhaust Gasket
- Turbo Gasket

*THICKNESS:

.042" .064"

Cork

With a Shore A hardness of 50–65, it provides a balanced mix of softness and durability for a reliable seal under moderate pressure.

RECOMMENDED USE:

- Valve Cover Gaskets
- Oil Pan
- Timing Cover Gaskets
- Low-Torque Applications

*THICKNESS:

.031" .094" .125" .156"
.188" .250"

***NOTE: Not all thicknesses are available for every application.**

HTS

Featuring a high-strength, fiber-reinforced sealing material designed for demanding thermal and mechanical environments. It features a 75% graphite and Kevlar fiber blend, mechanically bonded to a perforated stainless steel core for enhanced structural integrity. Ideal for high-temperature sealing applications, with a short-duration maximum temperature rating of 760°C (1400°F).

RECOMMENDED USE:

- Intake Gaskets
- Exhaust Gaskets
- Turbo Gaskets

*THICKNESS:

.060"

Fiber

Fully cured nitrile butadiene rubber binder for maximum fluid resistance. It has excellent sealability in a variety of environments and flange conditions. Robust chemical resistance suitable for sealing oil, coolant, fuel, and is designed to withstand maximum temperatures up to 290°C (550°F).

RECOMMENDED USE:

- Intake Gasket
- Oil Pan Gasket
- Engine Case Gaskets
- Water Pump/Thermostat
- Valve Cover Gasket

*THICKNESS:

.012" .015" .020" .031" .039"
.047" .062" .080" .094" .125" .188"

AFM

A chemically blown, compounded nitrile synthetic rubber bonded to a durable aluminum core. Engineered for reliable sealing performance, it offers excellent temperature resistance exceeding 205°F. AFM stands out with an impressive 85% recovery and strong torque retention, ensuring consistent sealing without the need for additional sealants or re-torquing.

RECOMMENDED USE:

- Engine Case Gaskets
- Intake Gaskets
- Oil Pan/Pump Gaskets

*THICKNESS:

.018" .032" .060" .075"

CFM-20

Tanged and galvanized steel core. An asbestos-free soft material compound containing aramid fibers, inorganic fillers, and high-grade binder elastomers is applied to both sides of the core.

RECOMMENDED USE:

- Head Gasket
- Intake Gaskets
- Plenum Gaskets
- Base Gaskets

*THICKNESS:

.043" .059"

TNG Fiber

High-density material with a fully cured nitrile binder. Excellent resistance to fuel, oil, and has good tensile strength. Intended for high flange pressures and short-run duration max temperatures up to 350C (650F).

RECOMMENDED USE:

- Intake Gasket
- Carburetor Gasket
- Supercharger Gasket

*THICKNESS:

.060" .062"

**NOTE: Not all thicknesses are available for every application.*

STREETpro

by Cometic Gasket

Cometic's StreetPro gasket kits are built to meet or exceed OE standards engineered for rebuilders who demand reliability and convenience in one complete package. Each kit includes all the essential gaskets and seals needed for a successful engine rebuild.

Available for a wide range of applications, including: Domestic, Import, and Diesel Engines.

Top End Diesel Gasket ProKit

Transmission Gaskets

Why trust your expensive transmission to some flimsy paper gasket? Keep your transmission fluid and gear lube where it belongs with our Aluminum Foamet Material (AFM) Gaskets. AFM consists of an aluminum core and features a foam rubber coating bonded to both sides. Ideal for sealing less than perfect surfaces and can be installed without the use of additional sealers!

Turbo Gaskets

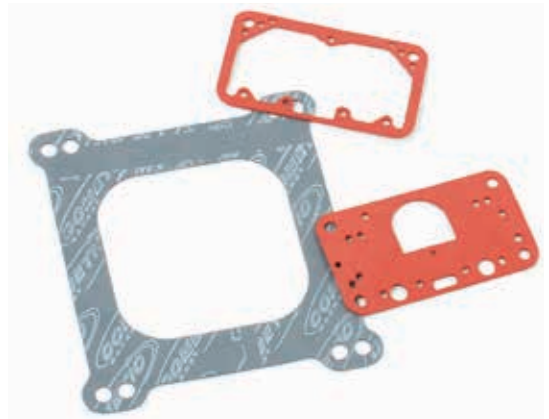

Manufactured from a high grade stainless steel, these turbocharge gaskets get the job done the first time! The embossed spring steel maintains a torque set and won't burn through or push out. Does not require additional sealers.

Race inspired designs and materials ensure that these valve cover gaskets will perform well above the OE standard. Cometic valve cover gaskets surpass the quality and ability of typical cork or paper gaskets offered by other manufacturers. Withstands blowing out, over tightening, and high vacuum all at an affordable price.
